PRONE

BRAVO

TAKE CHARGE OF YOUR BUSINESS WITH MANAGED PRIVATE NETWORKS

Mining   Oil & Gas   Public Safety   Airports   Events/Facility Management

Industry & Manufacturing   Transportation & Logistics   Ports   Steel Plants

EMPOWERING CRITICAL OPERATIONS WITH SECURE AND RELIABLE COMMUNICATION

Improved Mobility & Reliable Coverage

Ideal for mining, ports, airports and manufacturing, PRO ONE Bravo ensures seamless connectivity over vast areas, enhancing mobility and delivering reliable coverage even in remote or challenging environments.

Enhanced Security & Data Privacy

Ensure complete control over your sensitive data by keeping it on-premises, reducing reliance on public networks. With higher security protocols, your data remains protected against unauthorized access and threats.

High Performance & Low Latency

Experience ultra-reliable, low-latency communication (URLLC) that supports mission-critical applications. With real-time data processing, ensure rapid responses and seamless connectivity for your most demanding operational needs.

Dedicated Network Resources

Dedicated network resources ensure exclusive use, free from public user interference. With guaranteed bandwidth and Quality of Service (QoS), the network is optimized to meet your enterprise's unique operational requirements.

Support for IoT and Industry 4.0

Seamless connectivity enables industrial automation, supporting AI-driven analytics and edge computing. It enhances efficiency in smart factories, warehouses, and other IoT-driven environments, optimizing operations and driving Industry 4.0 innovation

Comprehensive Recording Option

Record and store voice, data, and video communications securely for playback, ensuring accurate record-keeping, compliance, and operational review when needed.
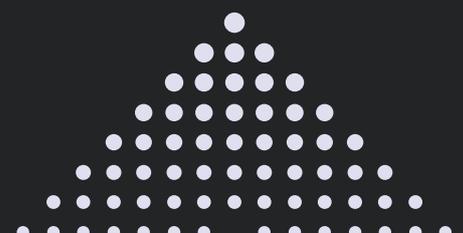

Managed Spectrum for Seamless Connectivity

Enjoy seamless connectivity and optimized performance with spectrum fully managed by PRO ONE, ensuring reliable, secure, and efficient communication across all devices and networks.

End-to-end Support

Our comprehensive end-to-end support ensures seamless operations with on-site and off-site assistance, expert troubleshooting, regular updates, and proactive maintenance—keeping your mission-critical communication secure, reliable, and always operational.

Simplifying critical communication for a complex world.

# TAILORED PLANS FOR OPERATIONAL SUCCESS

GRPTALK PLAN

• Unlimited Group Call
• On Device Location Services

MAXICALL PLAN

• Unlimited Private Audio Calls
• Unlimited Private Video Calls
• Unlimited Group Video Calls
• Unlimited Group Audio Calls
• Unlimited Multimedia Data Transfer
• On-device Location Tracking services

MAXICALL DISPATCHER PLAN

• Unlimited Group Audio & Video Calls
• Unlimited Private & Group Messaging
• Duplex calls
• Emergency Call
• Unlimited Multimedia Data Transfer
• Live Location Tracking
• Location Based Calling
• Location based Alerts

RECORDING SERVICE (OPTIONAL)

Voice, data, and video recording for playback are included with all plans, ensuring secure, reliable access to your communications whenever needed.
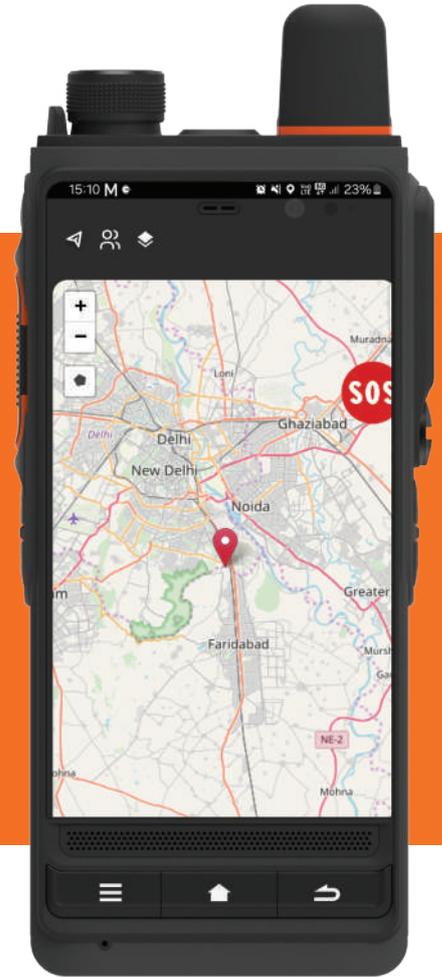

FEATURE OVERVIEW PER PRO ONE ACCOUNT

Compatibility	Android (above version 6)	Android (above version 6)	Windows 8.1/10 with Chrome or Internet Explorer

DEVICES FOR EVERY CRITICAL REQUIREMENT

We offer a flexible and open device ecosystem with a wide selection of Mission Critical X (MCX) devices, allowing you to choose the best fit for your needs. With no device lock-in, you can bring your own device (BYOD) or opt for premium, professional-grade alternatives.

Our advanced Mobile Device Management (MDM) solution simplifies remote management, ensuring regular software updates and enhanced security to keep your devices secure and operational. The ecosystem also features a range of accessories, adaptable to various operational environments.

PRO ONE Bravo devices are designed for enterprise ruggedness, offering reliable performance across industries. Built for critical communications, these devices are durable, user-friendly, and cost-effective, providing unmatched value in demanding environments.
